Your Guarantee of Genuine Snap-On Service

OVER two hundred-fifty Snap-On salesmen, traveling out of twenty-six branches, wear this badge for your protection. Look for it — it is your guarantee of getting genuine Snap-On Wrenches and replacement service. Don't let anyone tell you he is an authorized Snap-On salesman without this badge, or that he sells genuine Snap-On Wrenches unless the name Snap-On is plainly stamped on the handles and sockets of his samples.

In Every Shipment of Snap-On Wrenches

Snap-On Socket Wrenches and Blue Point Tools

SNAP-ON Wrenches are used and recommended by more good mechanics than any other line of socket wrenches. It is only seven years since we first introduced them, but their quality and remarkable advantages quickly won the preference of the trade. Our mechanic friends then began to call upon us for other hand tools in the same quality class with Snap-On Wrenches.

To meet this demand we have developed our own line of Blue Point Open End and Tappet Wrenches, Punches, Chisels and other tools. The wide popularity of Blue Points among Snap-On users is the highest possible recommendation of quality.

Prices Are Net To The Trade

(Subject to change without notice)

We do not mark our prices up on a high list basis in order to offer you a meaningless discount. All prices shown are net to the trade and are consistent with the cost of producing tools of Snap-On and Blue Point quality. They are absolutely the standard prices quoted to the trade by everyone selling these tools.

Whenever you need anything in our line between calls of our salesman, mail in your order. The tools will be rushed to you and our salesman will be given credit.

GUARANTEE

Every Snap-On Unit is guaranteed for ONE YEAR from date of purchase. Should any unit break within this period—due to defects in workmanship or materials—hand the broken part to the salesman or mail it to our nearest Branch Office and it will be replaced promptly—free of charge.

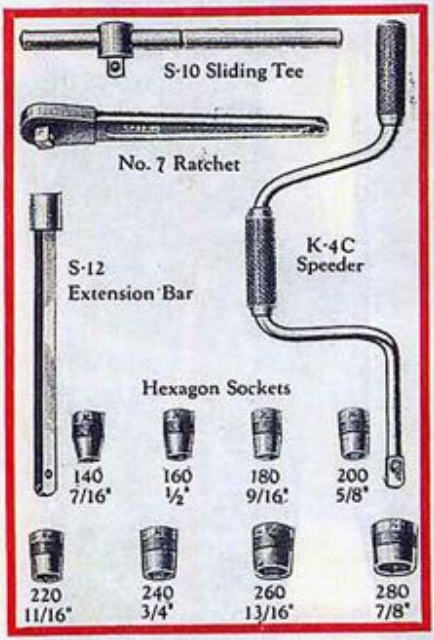
Junior Service Set

JUST the set for the young fellow starting out as an apprentice and who cannot afford one of the more complete and therefore, more expensive Snap-On sets. Compare this set carefully with any other socket wrench outfit offered you at the same price.



Set Contains 12 Units

K-4C—Swivel Grip Speeder..$1.50

S-10—Sliding Tee and Offset....$1.00

No. 7—Flat Ratchet $3.25

S-12—Extension Bar, 10".....$0.65

Hexagon Sockets

No. 140—7-16".....35c

No. 160—½".....35c

No. 180—9-16".....35c

No. 200—⅝".....35c

No. 220—11/16".....35c

No. 240—¾".....45c

No. 260—13-16".....45c

No. 280—⅞".....45c

No. 99 Set—Consisting of the above tools. Net..$9.50

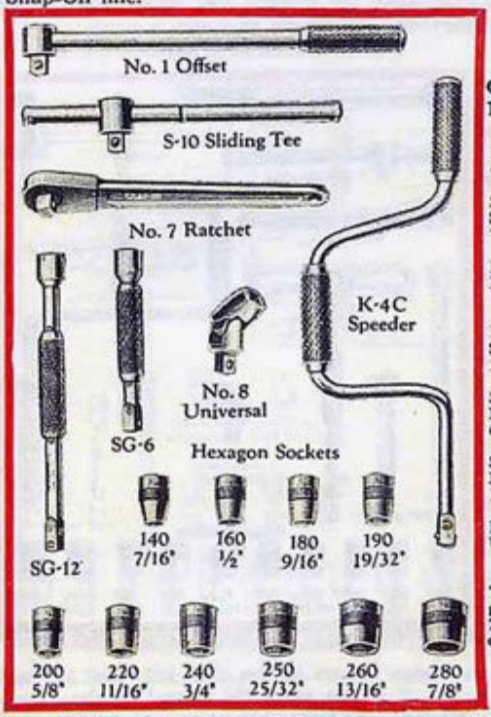
Junior Set Handles and Sockets are exactly the same high quality as Snap-On units in the larger sets. These are the tools you at least ought to have to start with. Additional units can be added as desired until you have, for example, the entire Super Service Set of genuine Snap-On Wrenches.

No. 99-B Set—The above tools in strong, black lacquered, metal carrying case. Net..... $10.85

Snap-On Sockets are Milled from Solid Bars of Steel

Standard Service Set

THIS set is made up of Snap-On Handles and Sockets which we consider a necessity to a well-equipped mechanic. These units are the real backbone of the Snap-On line.



Set Contains 17 Units

No. 1—Offset $1.00

S-10—Sliding Tee 1.00

No. 7—Ratchet 3.25

K-4C—Speeder, 15"... 1.50

SG-6—Extension, 6"... .80

SG-12—Extension, 10"... .95

No. 8—Universal 1.75

Ten hexagon sockets 7/16" to 7/8" openings $3.90

No. 105 Set—Consisting of the above tools. Net. $14.15

Although the larger sets contain certain additional units, giving a greater range of convenience and efficiency, you can keep adding more Snap-On extra convenience attachments to this set as needed. The handy metal case completes this excellent outfit.

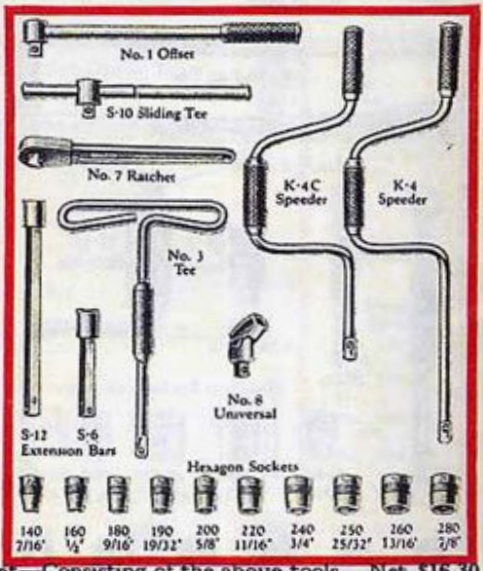
No. 105-B Set—The above tools in case. Net. . . $15.50

Master Service Set

THIS is the set owned by over 500,000 mechanics throughout the world and the set upon which Snap-On reputation for quality and service is founded. A highly practical assortment of tools.

Set Contains 19 Units

No. 1—Offset $1.00
S-10—Sliding Tee . 1.00
No. 7—Ratchet 3.25
K-4—Speeder, 19" .. 1.50
K-4C—Speeder, 15" .. 1.50
No. 3—Tee . 1.15
S-6—Extension, 5" ... .60
S-12—Extension, 10" .. .65
No. 8—Universal 1.75
Ten hexagon sockets 7/16" to 7/8" openings $3.90



No. 111 Set—Consisting of the above tools. Net . $16.30

This set has been known as the No. 101, No. 111 and No. 117 — but it is the same old friend of the garage mechanic and going stronger than ever. Has a few more units than the Standard Set and is a socket wrench outfit any mechanic may well feel proud to own.

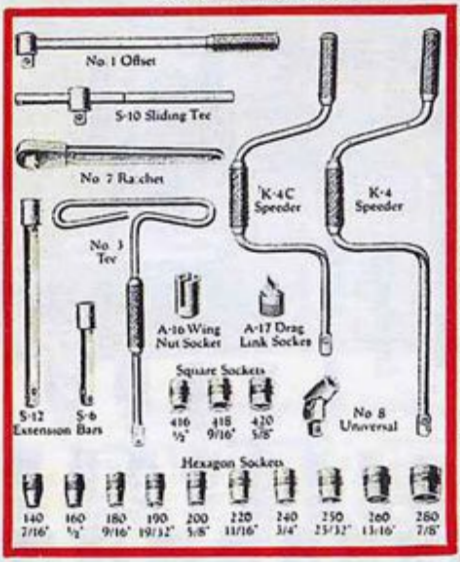
This sturdy, carefully designed metal case offers real protection to the tools and keeps them in convenient order. Has improved hanger arrangement—easy to remove tools, yet they stay securely in place.

No. 111-B—The above tools in case. Net.....$20.55

Senior Service Set

ALL of the efficiency of the Standard and Master Service Sets, plus more extra conveniences — a set that the older, experienced mechanics say is about perfection for automobile service.

Set Contains 24 Units

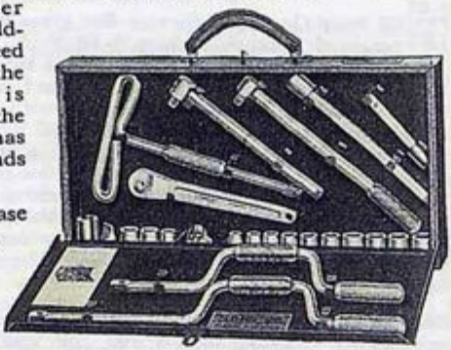


No. 1—Offset $1.00
S-10—Sliding Tee 1.00
No. 7—Ratchet 3.25
K-4—Speeder, 19" .. 1.50
K-4C—Speeder, 15" .. 1.50
No. 3—Tee . 1.15
S-6—Extension, 5" ... .60
S-12—Extension, 10" .. .65
No. 8—Universal 1.75
Ten hexagon sockets. $3.90
Three square sockets 1.25
Drag Link socket .65
Wing Nut socket .85

No. 115 Set—Consisting of the above tools. Net. $19.05

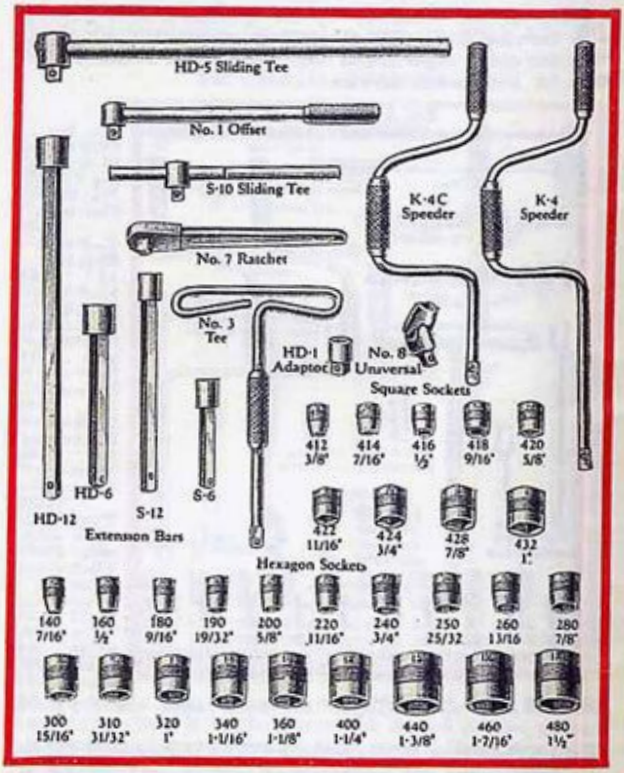
The three sizes of square sockets in this set are very handy for frame, body and main bearing work. The Wing Nut and Drag Link Sockets are also very popular units. Of course, other tools can be added as the need arises, but the Senior Set is right up to the minute and has made thousands of friends.

The metal case 3"x10⅝"x21", is an ideal container. Handsome black lacquer finish.



No. 115-B Set—The above tools in case. Net. $23.30

Super Service Set



THE Snap-On Super Service Set gives you the entire range of hexagon sockets to fit S. A. E. sizes from ¼" to 1" thread diameter, U. S. S. nuts from ¼" to ⅞", U. S. S. cap screws from ¼" to 1¼", and square sockets from ⅜" to 1". Twenty-eight sockets, with every conceivable handle hook-up — actually several hundred wrench combinations that every good mechanic needs — at only a fraction of what they would cost in one-piece wrenches — and backed by the Snap-On guarantee and replacement service. The heavy metal cabinet makes just the carrying case needed for the set — designed so that all tools are within quick reach and can be easily checked against loss.

The Super Service Set is the last word in socket wrench equipment — buy it now if you can and be the best equipped mechanic in your shop.

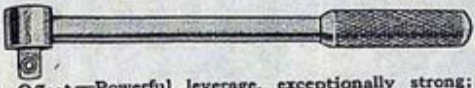
Quality and Leadership

As leaders in the field, the outstanding developments in socket wrenches have always originated with us. Snap-On has always had the foresight to introduce first the really important improvements of greatest service to you in your work.

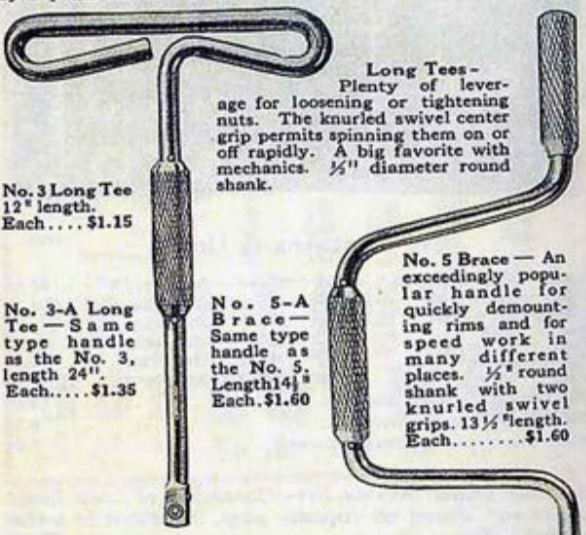
As good as Snap-On Wrenches have been in the past, in present production their quality far exceeds previous production. We expect to keep Snap-On always foremost in quality and service.

Master Handles

EVERY Snap-On Master Handle fits every Master Socket and Attachment. Socket receiving ends are ½" square. A spring-backed friction ball, recessed into the shank, grips the socket firmly. Two case hardened balls on opposite sides of the shank hold the socket in correct position.



No. 1 Offset—Powerful leverage, exceptionally strong; made to reach into close places. Head and socket receiving end milled from chrome vanadium steel; heat-treated; press fitted onto a ⅝" diameter round, high carbon steel handle, heat treated and reinforced by a special tool steel pin; 12" length. Each $1.00



Long Tees—Plenty of leverage for loosening or tightening nuts. The knurled swivel center grip permits spinning them on or off rapidly. A big favorite with mechanics. ½" diameter round shank.

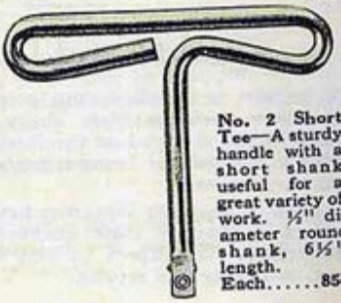
No. 3 Long Tee 12" length. Each....$1.15

No. 3-A Long Tee—Same type handle as the No. 3, length 24". Each.....$1.35

No. 5-A Brace—Same type handle as the No. 5. Length 14½" Each.$1.60

No. 5 Brace—An exceedingly popular handle for quickly demounting rims and for speed work in many different places. ½" round shank with two knurled swivel grips. 13½" length. Each.....$1.60

No. S-10 Sliding Tee—Bar ⅝" diameter, grooved in center. Spring backed ball inside wrench head snaps into groove to make a practical tee without preventing its free action as a sliding bar. Also holds head at any point on bar at any desired angle. Head locks on either end of bar to form a practical offset handle with the head flush with the end of bar. Length 10" A very useful tool. Each..... $1.00



No. 2 Short Tee—A sturdy handle with a short shank useful for a great variety of work. ½" diameter round shank, 6½" length. Each.....85c

All Prices Quoted are Net to the Trade

Master Handles

SNAP-On Handles are made from special analysis steel and have a non-rust nickel finish. Sockets snap on and off the handles quickly and easily—yet they fit so firmly that a Snap-On Wrench is as strong as if made in one piece.

Speeders—Long and short types for all purposes

One-half inch diameter round shank, knurled swivel grip.

No.	Length	Each
4-F	13"	$1.10
4-C	15"	1.25
4	19"	1.50
4-A	21"	1.80
4-B	27"	1.50

Extension Bars—Lengthen the reach of any handle. Made from ½", high carbon steel, heat treated to give great strength and lasting service.

No. S-6 Extension Bar, 5 inch length Each.... 60c

No. S-12 Extension Bar, 10 in. length. Each..... 65c

Swivel Grip Speeders—Improved type, with comfortable swivel center grip which makes them more handy and efficient in operation. Round shank, ½" diameter.

No.	Length	Each
K4-C	15"	$1.50
K4	19"	1.50

No. SG-7A—Swivel Grip Socket Receiving Plug for Flat Ratchet. Has a self-contained ratchet. See page 13. Each.....95c

No. 7 Flat Ratchet Wrench—Improved design—two pawls instead of one to give greater strength; fifteen teeth on the ratchet wheel instead of the usual ten or twelve to work in closer places; made of special analysis double heat-treated steel, machined to perfection and heavily nickel plated; 9" length. Each....$3.25

No. 7-A—Extra Socket Receiving Plug. Each.....40c

No. S-5 Sliding Tee—Bar 9/16" diameter; slides freely in the wrench head. Where only a half turn is possible, you can slide the bar back and forth and quickly run a nut on or off without removing the wrench for each turn. Each.....75c

Handle Attachments

Universal Joint

Snap this Universal onto a handle, then snap on a socket and you have a wrench that will work freely at nearly a 90° angle. It gives you as many flexible wrenches as there are Snap-On wrench combinations.
No. 8 Each.....$1.75

Adaptor

Snap this Adaptor onto any of the Master Handles and you can use the large sizes of Heavy Duty Sockets on them.
HD-1 Each..... 60c

Swivel Grip Extension Bars

You'll like the handy way they work, especially on the S-10 Sliding Tee and the No. 2 Short Tee. These Extension Bars form the same handle adaptations as the regular Bars shown on page eleven, but the swivel grips are an added convenience.
SG- 6 Lgth. 6" Each 80c
SG-12 Lgth. 10" Each 95c

Ratchet Attachment

Snap this Attachment onto any handle, then snap on a socket and you have a powerful ratchet wrench. Simple in action. Can't slip. Nothing to break or get out of order. When in mesh the No. 6 Ratchet has the form and strength of a solid piece of steel. Invaluable for fast work on many difficult nuts where no other type of wrench can be successfully used.
No. 6 Each..... $2.60

Special Short Extension

Especially adapted for use on Offset, Flat Ratchet and Sliding Tees. Gives proper reaching length for Ford Generators, Carburetors and Cylinder Head work.
No. 37-F Each.. 50c

Special Long Extension

S-20—A needed extension for cylinder head stud bolts. Clears cowl and greatly simplifies this job. An ideal hook-up with S-5 or S-10 Sliding Tee. Length 18".
Each..... $1.00

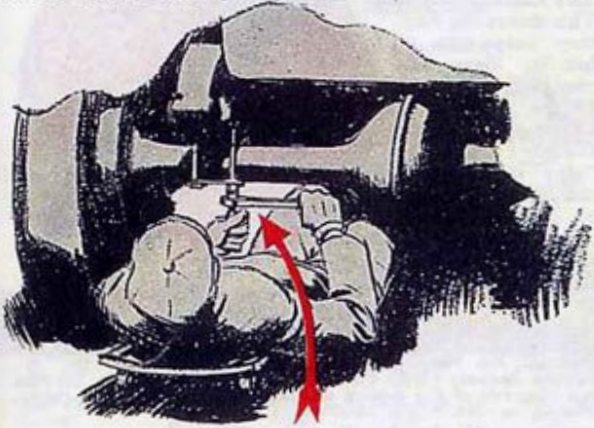
Net Trade Prices Quoted Throughout

Important New Attachment for Flat Ratchet

A SOCKET receiving shank with knurled swivel grip and special ratcheting feature. Holds wrench steady when working from below. After a nut has been loosened until the Flat Ratchet will no longer operate on it, you can quickly remove the nut with this handle without using your fingers. Also equally as handy for running nuts on to a point where Flat Ratchet will operate. The notches on the knurled grip and the ball stop on shank, with a spring inside the handle, give you an easy ratcheting action or a freely running swivel, as desired.

SG-7A — Swivel GripSocket Receiving Plug for No. 7 Ratchet. Each 95c

HD-7C—For HD-7 Heavy Duty Ratchet. Each.....$1.35



It is easy to see the value of this attachment here. You can think of many more jobs where it would be just as useful.

Flexible Sockets

SAVE you a lot of tough work fumbling after those hardest of the hard-to-reach nuts and bolts. You know the ones—such as rear cylinder studs, motor base bolts and timing gear cover nuts. Machined from Chrome Vanadium steel, heavily nickeled. Work at a 90 degree angle.

LIC. YORK PAT., 12-7-'20

No. 16	No. 18	No. 20	No. 22	No. 24

$1.65	$1.65	$1.65	$1.65	$1.65

No. 404 Set—One each of above five sizes of flexible sockets..... $8.25

Milled Sockets

Snap-On Sockets are milled from solid bars of Chrome Vanadium or Special Alloy steel, famous for toughness and durability. They are carefully broached to accurate size and tapered to as thin a wall as strength and durability will permit.

Snap-On Sockets are finished in heavy, non-rust nickel and double heat treated to give unlimited service. There is no comparison between the lasting qualities of a Snap-On and the ordinary makes of sockets. This shows the way they snap onto a handle. Easy on, easy off, yet the handle opening is so correctly machined, that no "play" is allowed when the socket is snapped on. The spring-backed ball locks it firmly and the two ball stops on the shank hold it in place.

Key to Socket Sizes

Hexagon Sockets—The first two numerals of the catalog number indicate the size of the socket in thirty-seconds of an inch. To illustrate: No. 140 Socket is 14/32" or 7/16".

Square Sockets—With the exception of No. HD-444, the last two numerals of the catalog number indicate the size in thirty-seconds, as—No. 412 is 12/32" or 3/8".

Order by Catalog Number

In ordering by mail, to insure correct and prompt service, order all Snap-On Units by Catalog Number.

Chrome Vanadium or Special Alloy Steel

Special Snap-On Sockets

Extra Deep Hexagon Sockets

S-240
¾"—90c

THESE are 2½" over all and are offered in answer to a big demand from mechanics for sockets of extra depth in these sizes for certain jobs where the nuts are set down deeply. They are especially good on body bolts, spring U bolts, spark plug work and some main bearing work, especially on Continental motors.

S-280
⅞"—95c

Special Ford Socket

Ford Cam Shaft Nut and Front Bearing Socket—For quickly servicing the cam shaft nut; removes the spindle nut (Ford No. 2707-8) and adjusting cone (Ford No. 2705-6) without a tool change—at a definite saving of time and money.
36-F. Each.....75c

Alemite Socket

A labor saver on Alemite systems. Tightens the connections so they will not jar loose.
A-14. Each.....45c

Wing Nut Socket

Makes adjustments fast and easy where wing nuts are used in brake drum assemblies.
A-16. Each.....85c

Drag Link Adjusting Sockets

For slotted nuts on automobile and truck steering assembly housings.

A-15. 1¼" Blade. Each.....75c
A-17. 1" Blade. Each.....65c

Chevrolet Brake Guide Pin Socket

Made especially for use on the Chevrolet guide or anchor pin on brake assembly. With this unit you can make adjustment quickly—do the job in a fraction of the time it takes with any other tools and save a lot of fuss and bother. Fits all Chevrolet models from 1924 to the present. An excellent addition to your Snap-On equipment.
A-18 Each.....50c

Crank Case Drain Plug Sockets

Milled from Chrome Vanadium Steel

P-10
5/16"
45c

MAKE quick work of oil draining jobs on cars having drain plugs with square female openings; fits all Snap-On handles; square male ends of all required sizes. The time and bother they often save on a single draining job is worth the price of the whole set. No garage should be without them.

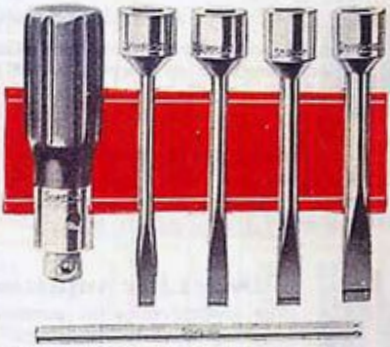
Snap-On Screw Driver Set



MORE than regular screw drivers. Improved type blades of special tool steel, plus Snap-On interchangeability, plus Snap-On quality. They fit all Snap-On handles as well as the patented wood handle shown. Note that a hole is drilled through the molded-in metal shank of the wooden handle to take the sliding bar whenever extra leverage is needed.

These blades will make a very valuable addition to your Snap-On equipment for quick body repair jobs, as well as steering assembly on some of the smaller cars.

F-1416—Hammer head wrench; sockets 7/16" and 1/2" double hexagon..... $1.00

F-1820-Hammer head 9/16" and 5/8" double hexagon $1.00

The development of cars and trucks with smaller engines and smaller units throughout have made these tools a necessity to the properly equipped mechanic.

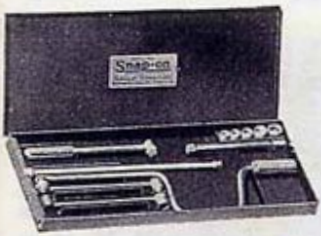
F-1 — Offset handle, 7/16" stock, 8" long.$1.00

F-120 3/8" 35c
F-140 7/16" 35c
F-160 1/2" 35c
F-180 9/16" 35c
F-200 5/8" 35c

Extremely small size — slender handles and short sockets with very thin walls—the only socket wrenches yet designed which will perform efficiently on many of the tricky jobs coming into the shops today.

F-4 — Speeder handle, 7/16" stock, 15" long, knurled swivel grip. $1.20

F-6 — Extension bar 6" long..65c



Made throughout of Chrome Vanadium tool steel — guaranteed to stand up under hard shop use.

No. 66 Ferret Set—Complete with above tools in handy metal case. Net....$8.55

No. F-7A Adaptor Plug—With the use of this extra adaptor plug the No. F-6 Ferret extension bar and all Ferret sockets may be used on the regular No. 7 Master flat ratchet. A valuable addition. Each.....40c

The ½" Ferret socket compared with regular ½" socket. Note how much smaller it is.

With the Ferret Set, Snap-On again proves leadership in designing new tools to make your nut turning work easier.

An Entirely New Development in Socket Wrenches

Heavy Duty Sets

For the Larger Nuts and Bolts

IN quality and design, just like the Master handles and sockets — in size much larger, giving you the advantage of Snap-On speed on the big stuff. Every garage mechanic needs a Snap-On Heavy Duty Set for certain jobs on pleasure cars, and especially for truck and tractor work. All units made of high carbon or alloy steels, scientifically heat treated.

HD-5 Improved Sliding Bar—¾" diameter round; spring backed ball inside of head holds head at any point on bar, head locks flush at end of bar by means of notch and ball stop, 18" length. Ea. $1.70

HD-6 Extension Bar, 8" length. Each.....$1.10

HD-12 Extension Bar, 16" length. Each.....$1.25

Hexagon Sockets-- *⅝-inch handle openings.*

By adding the HD-1 Adaptor, all Heavy Duty Sockets can be used on Master Handles.

Where Giant Snap-Ons Are Needed

SNAP-ON Giants are right at home on repair and maintenance of road building and construction equipment — huge trucks, crushers, scrapers and dredges. Their field of utility is practically unlimited — wherever there's extra heavy wrench work to do, Snap-On Giants are needed.

Square Sockets for Giant Set

These square sockets may be added to the Giant Set if desired.

XHD-446
1-7/16"
$1.65

XHD-452
1-5/8"
$2.30

Extra Ratchet Plug

XHD-7B — Socket end 7/8" square, to fit all Giant sockets. Each. 85c

Heavy Metal Case for Giant Set

Large and strong enough to accommodate both the Giant Set with all extra sockets and attachments and the Heavy Duty Set, or other tools if desired. This is a great convenience where the line of work makes it desirable to combine in one outfit all large handles and the complete range of large sockets from 15/16" to 2 3/8" openings.

Exceptionally heavy construction. Lid of full 16-gauge steel, sides and bottom 18-gauge; closely spot welded; large, comfortable steel handle, 3/4" diameter round, with five large rivets; powerful hasp and staple.

No. 28-B—25 3/4" long, 8 1/2" wide, 5 3/4" deep; weight 14 1/2 lbs., black duco enamel finish.

Midget Wrench Set

TAKE the tedious work out of the small jobs—and speed 'em up—with Snap-On Midgets! Think of the times you've struggled with a small nut in a hard to reach place—some little picayune job that wasn't worth half the time and effort you put on it—then you'll appreciate your need for Snap-On Midgets.

Handy in a hundred places—on little nuts and bolts. Great for ignition, carburetor, radio and all small electrical bench work.

Handles and sockets made just like the Master Snap-Ons—same quality, same speed and adaptability in actual use. Guaranteed for one year, of course.

M-3—Speeder Tee, swivel grip 6 inch.
M-5—Sliding Tee and Offset 4½ inch.

Hexagon Sockets

No. 55—Set complete in black enameled metal box $3.00

Gripper Screw Driver

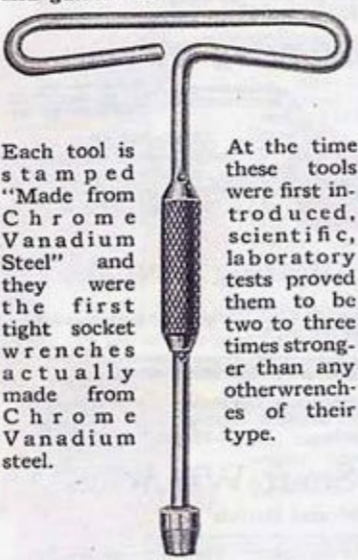
Here's a great little time and temper saver for starting small screws where fingers can't reach. The split blade springs into the screw slot and holds firmly while screw is being started. Wood handle. Easy to operate with one hand.

G-3—Gripper Screw Driver, 13" length. Each...65c

Tight Socket Wrenches

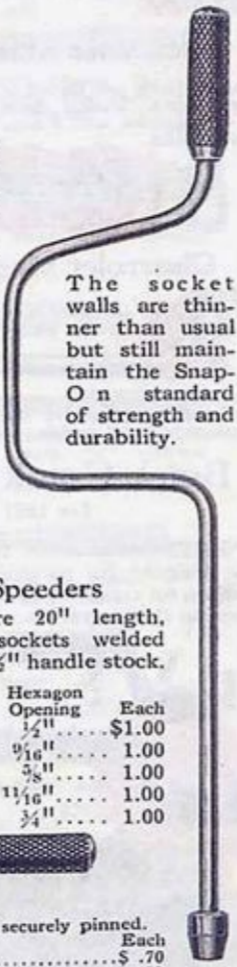
Made from Chrome Vanadium Steel

SNAP-ON Wrenches with the sockets welded on are designed for use on certain standard operations and assembly work. They are offered in response to the demands of mechanics who are regular users of Snap-On Interchangeable Socket Wrenches but want tools of this type in certain much used sizes with Snap-On quality and guarantee.



Each tool is stamped "Made from Chrome Vanadium Steel" and they were the first tight socket wrenches actually made from Chrome Vanadium steel.

At the time these tools were first introduced, scientific, laboratory tests proved them to be two to three times stronger than any otherwrenches of their type.



The socket walls are thinner than usual but still maintain the Snap-On standard of strength and durability.

Long Tees

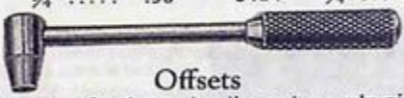
All are 12" length, with sockets welded onto ½" handle stock.

No.	Hexagon Opening	Each
5316	½"	$ .95
5318	9/16"	.95
5320	⅝"	.95
5322	11/16"	.95
5324	¾"	.95

Speeders

All are 20" length, with sockets welded onto ½" handle stock.

No.	Hexagon Opening	Each
5416	½"	$1.00
5418	9/16"	1.00
5420	⅝"	1.00
5422	11/16"	1.00
5424	¾"	1.00



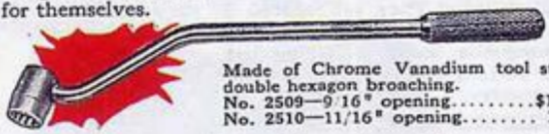
Offsets

Sockets press-fitted onto handles and securely pinned.

No.	Hex. Opening	Length	Stock	Each
5116	½"	8½"	7/16"	$ .70
5118	9/16"	9 "	½"	.70
5120	⅝"	9½"	9/16"	.70
5122	11/16"	10 "	⅝"	.70
5124	¾"	10½"	⅝"	.70

Special Offset Wrenches

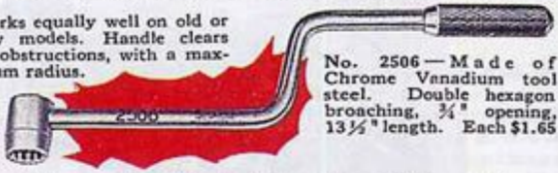
IDEALLY adapted for certain of the very hard-to-reach nuts on many cars. Any Snap-On salesman can show a big list of jobs on which these wrenches will quickly pay for themselves.



Made of Chrome Vanadium tool steel, double hexagon broaching.
No. 2509—9/16" opening.....$1.65
No. 2510—11/16" opening..... 1.65

Ford Rear Main Bearing Wrench

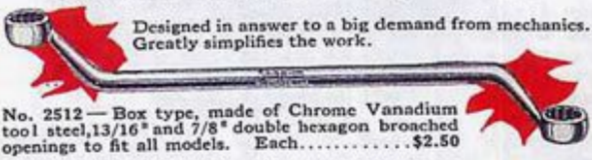
Works equally well on old or new models. Handle clears all obstructions, with a maximum radius.



No. 2506—Made of Chrome Vanadium tool steel. Double hexagon broaching, ¾" opening, 13½" length. Each $1.65

Chevrolet Main Bearing Wrench

Designed in answer to a big demand from mechanics. Greatly simplifies the work.

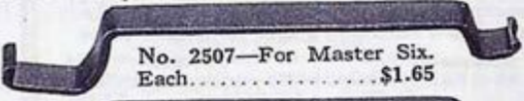


No. 2512—Box type, made of Chrome Vanadium tool steel, 13/16" and 7/8" double hexagon broached openings to fit all models. Each.....$2.50

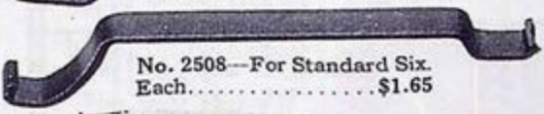
Buick Crank Shaft Wrenches

for 1927 Model Buick

THESE wrenches of the Spanner type, are especially designed for turning the crank shaft in the proper position for removing pistons. They save much time and labor on this operation.



No. 2507—For Master Six.
Each.....$1.65



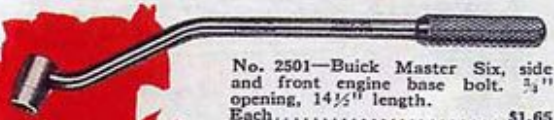
No. 2508—For Standard Six.
Each.....$1.65

This shows the tool in operation. Both ends are used in turning shaft into proper position.

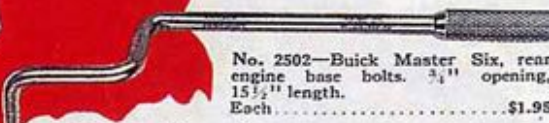
Buick Special Wrenches

Made from Chrome Vanadium Steel

THE first four tools are made primarily for tightening Buick engine base bolts. They save a lot of extra work in removing floor boards and the like. They are the only tools designed especially for these operations and there are no standard wrenches made which will do the work right. In addition, these tools have proved very valuable on many different jobs on other makes of cars.

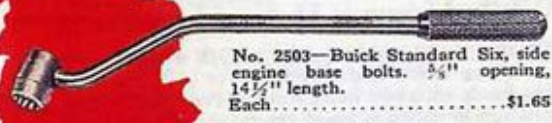


No. 2501—Buick Master Six, side and front engine base bolt. 3/4" opening, 14 1/2" length.
Each.....$1.65

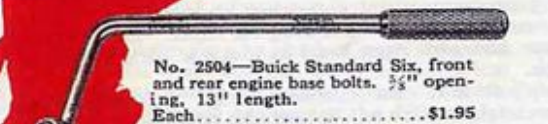


No. 2502—Buick Master Six, rear engine base bolts. 3/4" opening, 15 1/2" length.
Each.....$1.95

Buick Specials are all double or twelve point broached so as to require a very short turn of the handle in order to get another hold on the nut.



No. 2503—Buick Standard Six, side engine base bolts. 5/8" opening, 14 1/2" length.
Each.....$1.65

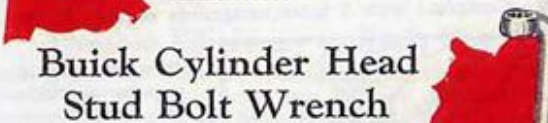


No. 2504—Buick Standard Six, front and rear engine base bolts. 5/8" opening, 13" length.
Each.....$1.95

No. 2500—Set of 4 Buick Special Wrenches.....$7.20

Buick Cylinder Head Stud Bolt Wrench

5/8" openings for Standard and Master Six.



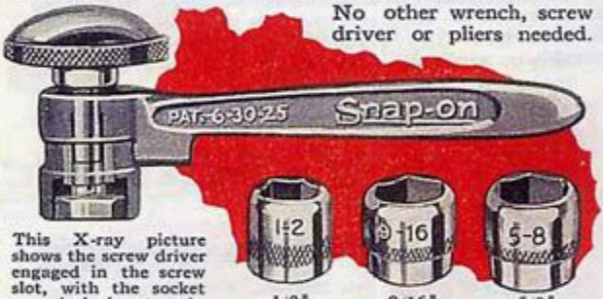
This is another tool made especially for Buick service. It was tested and approved as a correct and thoroughly efficient tool for cylinder head stud bolts. Takes all cylinder head stud bolts from the right hand side and has a great advantage over other wrenches which make it necessary to work from both sides. No. 2511—Each. Net.....$2.45

Worth Ten Times their Cost to Buick Shops

Snap-On Valve Clearance Adjusting Tool

DOES rocker arm tappet adjusting jobs on all valve-in-head motors in about one-third the usual time.

No other wrench, screw driver or pliers needed.



This X-ray picture shows the screw driver engaged in the screw slot, with the socket over the lock nut ready to lock it with wrench handle when adjustment is made.

1/2" Socket — For 1925 and earlier Chevrolet, Velie, etc.

9/16" Socket — For Buick, Marmon, Nash and others.

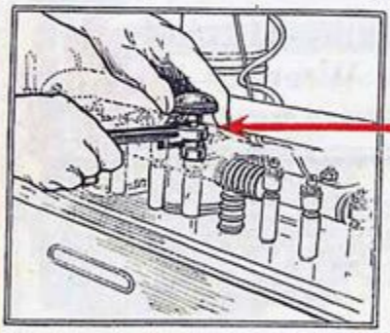
5/8" Socket — For Chevrolet 1926-1927 Franklin, etc.

Makes Accurate Adjustments Easy While Motor is Hot and Running

THE use of the tool is simple. With motor running at an idling speed insert socket over lock nut and turn knurled knob with left hand until driver blade slips into screw slot. With right hand insert recommended size of feeler gauge between valve stem and rocker arm, then turn knob until you feel a slight drag on feeler. Leave feeler in place and with right hand lock screw with handle of wrench.

No duplication of effort checking back. This tool makes an absolutely correct adjustment the first time. Sockets and screw driver made of Chrome Vanadium tool steel.

No. 21—Complete with 3 interchangeable sockets $2.75



Note how easy it is to use the Snap-On Valve Clearance Adjusting Tool—only one tool to hold. It will stay in position while feeler is being inserted to check clearance—leaves hands free to make accurate adjustment.

Boxocket Wrenches

Made of Chrome Vanadium Tool Steel

THESE are an improved and up-to-date design in box type wrenches, carefully heat treated, with rust-proof nickel finish — the best in workmanship and materials it is possible to produce. Blue Point Boxockets are preferred by good mechanics for their strength, toughness, great resistance to wear, and for their advantage in design over ordinary box type socket wrenches.

The double hexagon or twelve point broaching and thin walls permit Boxocket Wrenches to be used where clearance and turning space is extremely limited.

Built For Tight Places

Require *only one-half* as much space for handle movement as end wrenches to operate on hexagon nuts — and have the added advantage of greater leverage. Grip on all sides and do not chew up or round off corners of nuts. Boxockets will save time on much of your manifold, connecting rod and main bearing work, on head and base bolts, generator studs and many other difficult jobs. Boxocket Wrenches will do many of the difficult servicing jobs for which special wrenches have heretofore been designed and purchased.

Double Efficiency in Each Size

Each wrench has the same opening on both ends. Where you need a straight wrench you have it. If there are obstructions to clear you have the advantage of the offset end. This gives Blue Point Boxocket wrenches double the handle efficiency of other wrenches of this type. Sizes as follows:

No.	Length	Opening	No.	Length	Opening
X-14	7½"	7/16"	*X*-22	10¼"	11/16"
X-16	8"	½"	*X*-24	11¼"	¾"
X-18	8¾"	9/16"	*X*-26	12"	13/16"
X-20	9½"	⅝"	*X*-28	12¾"	⅞"

Prices on application.

Blue Point Open End Wrenches

MADE from the highest grade special analysis manganese tool steel, specified and carefully selected by metallurgical engineers for strength, toughness and fatigue resistance under the strain of hard usage. Forged, milled and individually heat treated by skilled workmen.

Jaws correctly designed, made to the proper thinness for greatest efficiency in operation, milled, .005 oversize for a neat fit that will not slip off the nut on a hard pull, nickel plated, highly polished.

Sizes, Prices and What They Fit

Open End Wrench Sets

MOST mechanics require several sizes of open end wrenches. You will not overlook the advantages of owning one of the following sets in a handy leatherette kit bag, which offers protection for the tools and makes it easy for you to check up and prevent their loss.

BPR-8—One each of 8 wrenches, Nos. 1214, 1416, 1618, 1619, 1820, 2024, 2225 and 2428.

Wrenches only	$6.90
Leatherette kit	.60
Complete set	$7.50

BPR-6—A popular set of S. A. E. sizes. One each of Nos. 1214, 1416, 1618, 1820, 2024 and 2428.

Wrenches only	$5.10
Leatherette kit	.40
Complete set	$5.50

BPR-5—One each of 5 popular sizes, Nos. 1416, 1618, 1820, 2024 and 2428.

Wrenches only	$4.45
Leatherette kit	.40
Complete set	$4.85

A complete set containing all sizes of Blue Point Open End Wrenches can be made up in leatherette kit if desired.

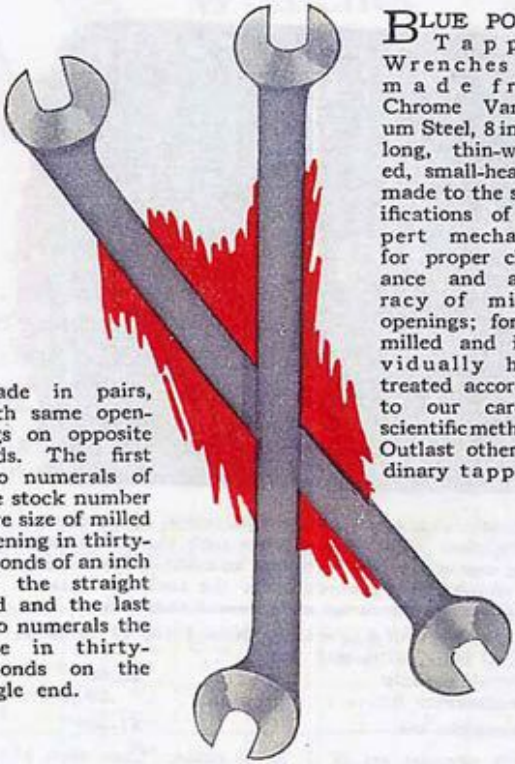
Key to Sizes

Open End and Tappet Wrenches

The first two numerals of the stock number indicates in thirty-seconds of an inch the size of milled opening on one end and the last two numerals the size on the other end.

In Ordering by Mail Please Give Stock Number

Tappet Wrenches



BLUE POINT Tappet Wrenches are made from Chrome Vanadium Steel, 8 inches long, thin-waisted, small-headed, made to the specifications of expert mechanics for proper clearance and accuracy of milled openings; forged, milled and individually heat treated according to our careful, scientific methods. Outlast other ordinary tappets.

Made in pairs, with same openings on opposite ends. The first two numerals of the stock number give size of milled opening in thirty-seconds of an inch on the straight end and the last two numerals the size in thirty-seconds on the angle end.

Rigid Pipe Wrenches

THE housing of these wrenches is unconditionally guaranteed against breakage or distortion — the biggest feature ever offered in a pipe wrench. Jaws made of high-grade tool steel. They grip and hold perfectly under the stiffest pull but you can't lock them on a pipe. The powerful I-beam handle will out-test any wrench, size for size. Hook jaw will not get a hollow back or break; heel jaw, as well as the hook jaw, is replaceable.

Straight Wrenches

No.	Size	Weight	Price	No.	Size	Weight	Price
6	6"	7 oz.	$1.10	18	18"	5 lbs.	$2.75
8	8"	15 oz.	1.15	24	24"	8 5/16 lbs.	3.75
10	10"	1 3/4 lbs.	1.35	36	36"	16 lbs.	7.25
14	14"	3 3/4 lbs.	1.75	48	48"	27 lbs.	11.00

End Wrenches

For all tight places such as coil pipes, pipes against walls and all pipes you can't get at with a straight wrench. Perfect one-hand adjustment. Can't pinch your fingers between wrench and wall. All parts interchangeable with straight wrenches.

No. E- 6—Length 6", weight 7 oz. Each.....$1.10
No. E- 8—Length 8", weight 15 oz. Each..... 1.15
No. E-10—Length 10", weight 1 3/4 lbs. Each..... 1.35

Diamond Adjustable Wrenches

Made entirely of high-carbon tool steel, subjected to a process of annealing, hardening and tempering that insures a remarkably long life of service.

Design and workmanship in keeping with the superior quality of steel of which they are made. We recommend Diamond Wrenches as the best quality tools of this type that are made.

No.	Size	Weight	Each	No.	Size	Weight	Each
4	4"	2 oz.	$0.65	12	12"	2 lbs.	$1.50
6	6"	5 oz.	.65	15	15"	4 5/16 lbs.	2.25
8	8"	10 oz.	.80	18	18"	7 lbs.	3.25
10	10"	18 oz.	1.00				

Repair parts carried in stock for quick replacement service.

Simplex Wrenches

End Wrenches That Ratchet

SPEED end wrenches that ratchet perfectly on or off. The correct opening locates itself on the nut so that you can reach in and use a Simplex in dark places or where you can't see the nuts. Made of Chrome Vanadium steel, heavily nickeled, polished heads. Remarkably efficient.

No. 11 Simplex Wrench—Six sizes in one, 7/16", 1/2", 9/16", 5/8", 3/4" and 15/16". Each.....$1.50

No. 14—Five openings — 7/16", 1/2", 9/16", 5/8" and 3/4". Each.....$1.50

No. 13—Four openings — 2 on each end—1/2", 9/16", 5/8" and 3/4". Each.....$1.50

No. 32—Four popular U. S. S. sizes—1/2", 19/32", 11/16" and 25/32". Each.....$1.50

How the No. 11 Simplex works. Fits perfectly on six sizes of nuts—can't chew up or round off corners of the nut.

For the nuts and bolts they fit, see the chart on page 30.

How Blue Points Are Made

BLUE Point Chisels and Punches are made on the same principle that the blacksmith used to employ in making them by hand, except that our power hammer forms them more accurately. The hammering tends to refine the grain and the low temperature at which they are formed preserves the carbon in the steel which gives it lasting quality. Blue Points are far superior to the ordinary drop forged tools which are formed at one blow and at such high temperatures that the carbon is burned out of the steel. The service you will get out of Blue Points is worth much more than the difference in price.

Blue Point Specials

Useful tools you should have in your outfit

Diamond Point Chisels

No. 19—3/8" stock, 1/8" point, 5 1/2" length.....Each 45c

No. 15—1/2" stock, 1/4" point, 6 1/4" length.....Each 50c

Each.....85c

No. 1658—1/2" octagon stock, 5/8" edge, 16" length
Each.....$1.25

Special Note! Chisels and punches, if made too hard, will break. If made too soft, they will flatten over. Blue Points are tempered medium to give long service for all around work. No good mechanic will abuse tools of this kind and expect them to stand up.

Long Tapered Punches

BLUE Point Punches, like the chisels, are hammer forged from Swedish tool steel, ground and heat treated in the same careful and painstaking way. You will appreciate their quality and finish.

No. 905—3/8" Stock, 5/32" point, 8" length. Each.....50c

Guarantee—Chisels and Punches

EVERY Blue Point Chisel and Punch is tested under rigid instructions to reject for the slightest visible defect. We will replace any tool, that in the reasonable usage for which it was designed, proves defective in workmanship or material, provided that claim for replacement be made within thirty days from date of purchase and is accompanied by the guarantee certificate and invoice.

Net Trade Prices Quoted on all Tools

Blue Point Pin Punches

QUALITY is given first place on the list of specifications for Blue Points. They are made by highly skilled workmen in a factory equipped with every modern facility for turning out quality tools.

Note: Nos. 603 and 604 Pin Punches are as strong and durable as it is possible to make punches of their extreme slenderness and fine points, but we cannot offer them under the broad guarantee that applies to other Blue Point Punches and Chisels.

3818	3/8	3/8	18	1.20

** Not shown. Long extremely slender blade.*

Blue Point Solid Shaft Screw Drivers

Drivers of exceptional strength and utility. Blade extends clear through handle to an enlarged hexagon butt, can't turn in handle. Ferrule riveted through handle and blade. Octagon stock, special tool steel, heat treated.

X- 144—Blade 1/4" wide, 4" long. Each.....$0.55
X-5166—Blade 5/16" wide, 6" long. Each..... .70
X- 388—Blade 3/8" wide, 8" long. Each..... .90

Snap-On Screw Drivers Shown on Page 18

Blue Point Bearing Scrapers

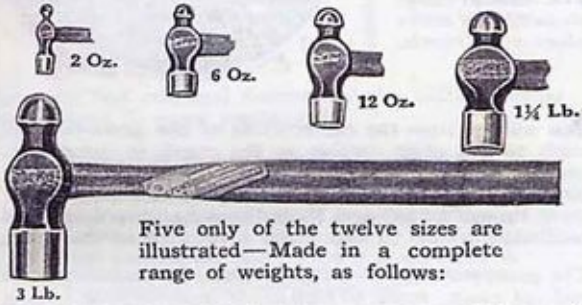
HAND forged, individually heat treated and tempered to give a scraping edge that will give longer and better service than any tools of their kind we have ever seen. Spoon style only, hollow ground so as to make them the most easily sharpened. 3 sizes as follows:

No.	Sq. St.	Blade Length.	Over All	Price
51	3/16"	1¼"	8"	$1.00
52	⅛"	2¼"	10¼"	1.35
53	¼"	2⅞"	10¾"	1.35

No. 5123-K Set-One each of the 3 sizes shown above in a leatherette kit. Set $4.00

Blue Point Ball Pein Hammers

A QUALITY line of hammers, correctly designed and balanced, handsome and distinctive blued finish, selected high-grade handles securely anchored in the heads.

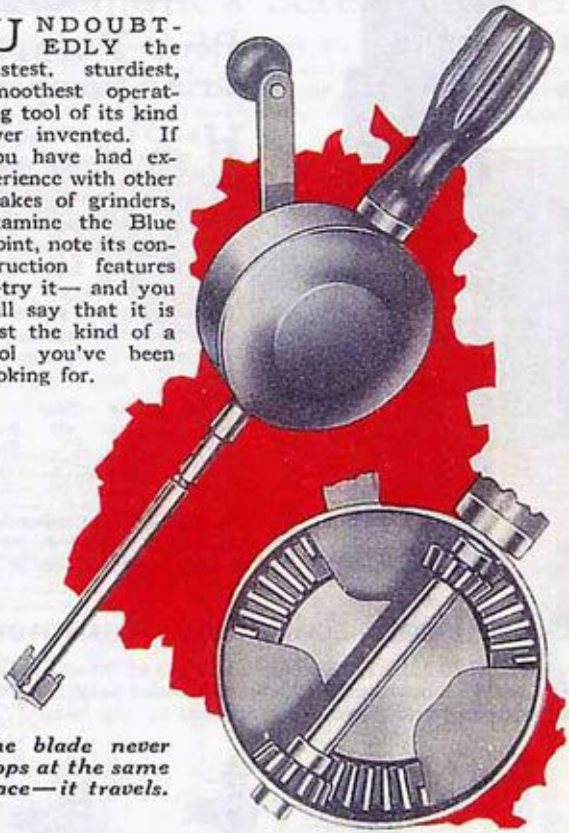


Five only of the twelve sizes are illustrated—Made in a complete range of weights, as follows:

No.	Weight	Price	No.	Weight	Price
7-0	2 Oz.	$1.30	1	1¼ Lbs.	$1.45
5-0	4 Oz.	1.30	2	1½ Lbs.	1.55
4-0	6 Oz.	1.30	3	1¾ Lbs.	1.70
3-0	8 Oz.	1.30	4	2 Lbs.	1.75
2-0	12 Oz.	1.30	6	2½ Lbs.	2.05
0	1 Lb.	1.35	8	3 Lbs.	2.35

Blue Point Valve Grinder

UNDOUBTEDLY the fastest, sturdiest, smoothest operating tool of its kind ever invented. If you have had experience with other makes of grinders, examine the Blue Point, note its construction features —try it— and you will say that it is just the kind of a tool you've been looking for.



The blade never stops at the same place—it travels.

You will see from the construction of the gears that the teeth on the plate revolve as the crank is turned, engaging first the shaft pinion at the top, then the shaft pinion at the bottom—they are set so as to turn the shaft three times forward and three times backward in rapid oscillating motion to each single revolution of the crank.

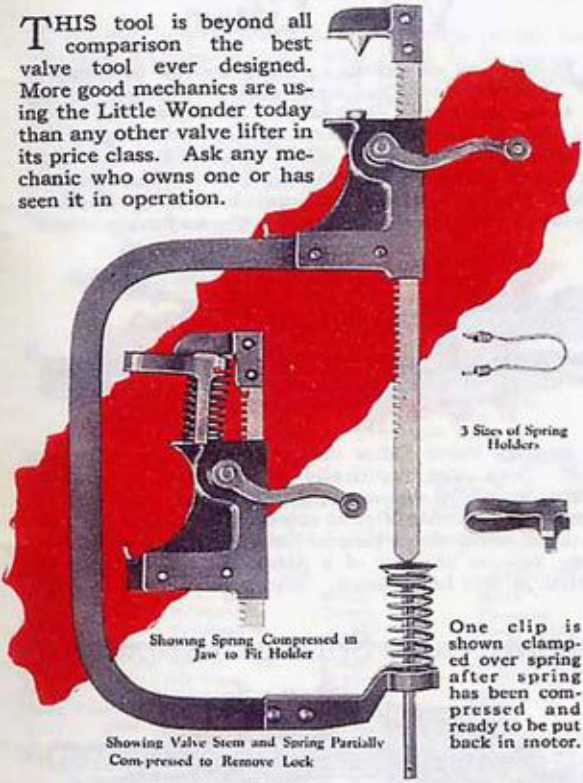
The gears are not the ordinary stamped kind—they are real cut gears, made of high-grade, non-wearing bronze. The bearings are also of non-wearing bronze. Ball bearing thrust—smooth and easy running.

The remarkable construction features of the Blue Point Valve Grinder make it a real mechanic's tool that will stand up in shop use and last indefinitely.

Dark blue duco-enamel finish. Each $4.25

Little Wonder Valve Tool

THIS tool is beyond all comparison the best valve tool ever designed. More good mechanics are using the Little Wonder today than any other valve lifter in its price class. Ask any mechanic who owns one or has seen it in operation.



One clip is shown clamped over spring after spring has been compressed and ready to be put back in motor.

These are the principal features of the Little Wonder which appeal to every mechanic:

1. Adaptability to practically all cars and trucks.
2. Positive verticle lift. Can be stopped at any desired point with positive lock.
3. Jaws of spring steel, instantly adjust to any size of valve spring.
4. Jaws exceptionally thin. When it is impossible to get under spring, jaws will fit into any coil so that spring can be compressed and valve pin removed.
5. Compressing feature when you are ready to put spring back in motor.
6. Lifter large enough to clear exhaust manifold so that you can get to all springs without having to remove manifold, etc.

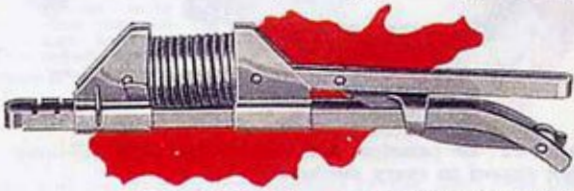
Little Wonder, complete with 3 spring holders. Each $7.50
Extra spring holders. Set of 3 ..... 1.35
Extra pair of jaws with rivets 1.00
Larger size Little Wonder, for Mack Truck. Each .. 8.50

The Sunnen Adjustable Valve Lifter

WORKS on all motors. Strong enough to take the largest motors and small enough to work well on the smallest motor. Guaranteed to work—and work right—on all vertical motors. Exceptionally good on the following cars which other makes of lifters have difficulty in raising: Baby Overland, Studebaker, Jordan, Dodge, Hudson, Essex, Packard 6 and 8, Cadillac, Chrysler, Paige, Jewett, all straight 8's, and many others.

The Sunnen Valve Lifter can be adjusted to any size motor. Jaws raise practically parallel and come close together for easily slipping onto the spring; very thin at the end. Lock holds lifter at any height. Made of hard, cold rolled steel, with a lacquer finish. If it should break in any way on account of a defect in workmanship or material, it will be replaced. Each.....$1.85

Sunnen Valve Spring Compressor



Recommended particularly for the Studebaker Standard Six, Star, Moon, Diana, Jewett, Essex and any other cars where there is little room to replace locks or keys. Well designed and strongly made — will compress springs of any size or stiffness.

Six blank clips are furnished with each Compressor. They are made of the finest steel and have ruled markings to aid in cutting them to the desired lengths, turning the ends to hold the spring.

Compressor complete with 6 clips.....$3.00
Extra Clips, Set of 6 ..... .75

Mack's Wheel Pullers

THE only wheel pullers made with pilot center drive. Real mechanic's tools—with a size to fit every car of standard parts—make wheel removal safe, without fear of damage to expensive axle parts.

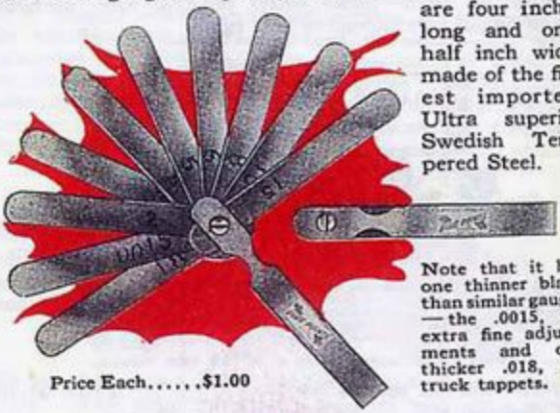
Ford Pinion Puller

No. 1—Ford Drive Shaft Pinion Pullers..... Price $1.15

All Prices Quoted are Net to the Trade

Blue Point Feeler Gauge

THIS is a strictly high-grade ten-blade tappet feeler gauge of tested accuracy and is as low in price as any eight-blade gauge of equal quality and size. The blades are four inches long and one-half inch wide, made of the finest imported. Ultra superior Swedish Tempered Steel.



Price Each.....$1.00

Note that it has one thinner blade than similar gauges — the .0015, for extra fine adjustments and one thicker .018, for truck tappets.

Vacuum Grip Pliers

THE standard of materials, workmanship and precision established for Vacuum Grip Pliers are the highest and closest standards physically possible. Comparative tests will prove to you that they are so far superior to other makes that they are in a quality class by themselves.

No. 17—End Cutting Nippers, 7" length. Each.....$1.90

No. 497—Bent Needle Nose Pliers. Note that they have an extra long reach, with a 22½ degree angle, 7" length. Each.....$2.25

(Continued on page fifty-three)

Vacuum Grip Pliers---Continued

THEY are forged from Special Electric Furnace Tool Steel and Swedish Steel for certain numbers, individually hardened and tempered in oil — not case hardened. Three distinct hardening operations — handles, joints and jaws. Close-fitting, smooth riding joints; sharp and uniform teeth with maximum gripping capacity; cutting edges hand-filed, sharp and accurately matched. They will stand up under the severest strain without springing the jaws. Heavily nickeled over copper plate and highly polished. Guaranteed without restriction to give satisfactory service.

No. 597—Special Valve Pin Plier. Matched grooves in jaws for tight grip on any size of pin; also cross milled groove. Very useful for other hard-to-reach jobs in addition to valve pins. Each . . $2.50

No. 96 Needle Nose — Without wire cutter, 6".
Each $1.50

No. 196-With wire cutter, 6".
Each $1.85

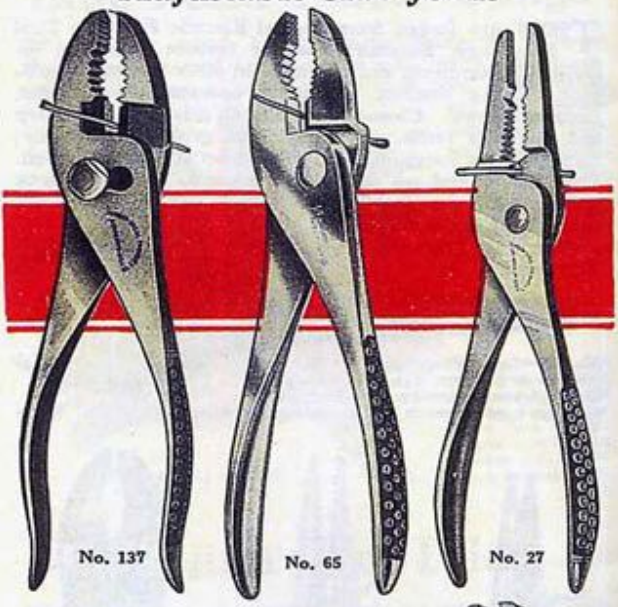
No. 97 Needle Nose -- Fashioned handle, without wire cutter, 7".
Each $2.00

No. 197—Fashioned handle, with wire cutter, 7".
Each $2.50

No. 47 Adjustable Side Joint--Heavy duty pattern, 7".
Each $1.50

No. 49 — Heavy duty pattern, 9".
Each $2.25

Adjustable Side Joint



No. 137—Linemen's plier handles, side cutter, 7". Each.....$2.00

Simonds Hack Saws

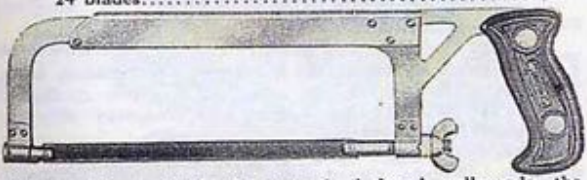
OUT-CUT and Out-Last any ordinary blades you can buy. Flexible back, with hard cutting edge. These styles are best adapted for your general run of work.

18 teeth to the inch, for cutting tool steel, iron pipe, hard metals and light angle iron.

32 teeth to the inch, for cutting thin tubes, sheet metals and the like.

No. 10 Assortment—10" blades, 12 coarse and 12 fine. 24 blades..... $1.70

No. 12 Assortment—12" blades, 12 coarse and 12 fine. 24 blades..... $2.00

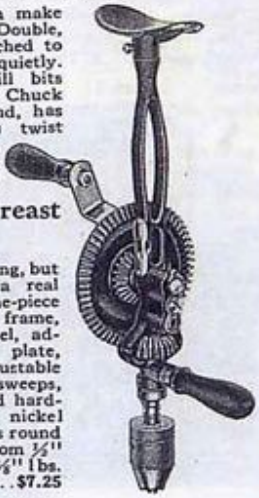


Hack saw frame, pistol grip, correctly designed, well made—the most popular frame on the market. Each..... $3.25

Blue Point Hand Drill

Several improved features in design make this an unusually efficient drill. Double, machine cut pinions with teeth pitched to insure spindle running smoothly and quietly. Speed gear 4" diameter. Six drill bits carried in hande. Chuck locks on spindle end, has steel jaws, takes twist drills up to ¼". Weight 2¼ lbs.

Each $5.60

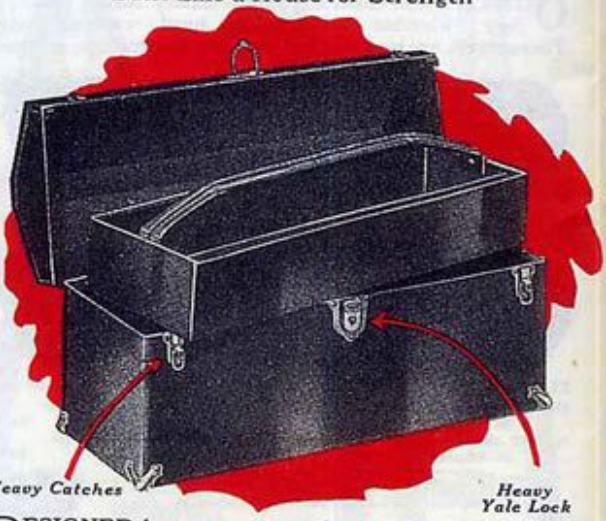


Blue Point Breast Drill

Double speed—strong, but light in weight—a real quality tool. One-piece malleable iron frame, equipped with level, adjustable breast plate, driving handle adjustable to three different sweeps, jaws machined and hardened, three-jaw, nickel plated chuck, takes round shank twist drills from ⅛" down. Weight 5⅜" lbs. Each..... $7.25

Snap-On Mechanikit

Built Like a House for Strength

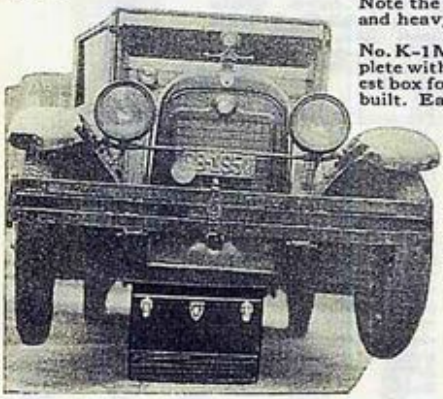


DESIGNED by an expert mechanic who knows from experience the kind of tool box a good mechanic wants. No other box of its size can compare with the Mechanikit for convenience, rugged strength and lasting qualities. Weighs twenty pounds, made of eighteen gauge heavy sheet steel, lid gable shaped to give extra strength, and additional room, corners heavily reinforced, size 21" x 10 ½" x 8½".

Note the Heavy Yale lock and heavy end catches

No. K-1 Mechanikit-Complete with tray, the strongest box for its purpose ever built. Each.....$8.50

No. KT-1—Tray only. Each....$2.50



An actual photograph showing the Mechanikit holding up a big Jordan without denting the lid or injuring the box in anyway. Real proof of its tremendous strength.

Motor Tool Truck

Strong as a Treasure Chest

WORTH double its price to any high-grade mechanic who has a lot of hard-earned money invested in fine tool equipment.

This massive chest not only provides absolute protection for a large collection of tools; but is an efficient working unit on the floor. Big ball bearing truck wheels make it easy to roll right to the job when loaded to the limit. Correct compartments hold tools within quick reach--no fumbling for the needed tool.

30¼" Long
19" High
12⅛" Wide

Baked on black enamel finish.

Note its heavy, full riveted construction—weighs almost a hundred pounds. Front and top of thick, 12-gauge sheet steel; other parts of 14 and 16-gauge. Six big, heavy steel hinges, studded with rivets; sturdy hasp of 5/32" steel that locks both the lid and drawer — only one padlock needed. Lid folds over the back and out of the way when open.

Net Each....$34.00

"Handy Man" Tool Holder

ALL that its name implies — a trusty, dependable helper for you on the job. No need to run back and forth to the bench for tools when you have the "Handy Man." It brings your tools right to where you are working, rolling freely on large roller bearing, swivel casters.

The three trays hold a big variety of tools and other items ready to be picked up quickly as you need them and the drawer makes a safe place to keep smaller and less frequently used tools. The cover turns back completely out of the way while you are working. By means of a double catch you can lock both the top tray and drawer with a single lock.

Sturdy construction. Trays and drawer of 16 gauge steel—the top tray 3" deep, the drawer 20" x 12" x 4", designed so that it will not sag or bind under any load put into it. Angle steel legs 1½" x 1½" x ⅛". Over all dimensions of Holder 18" x 24" x 34". Finished in durable black enamel. The "Handy Man" will soon pay for itself by saving your time and saving your tools.

Price Each, F. O. B. Aurora, Ill. $13.65

Zowie Soap Tabs

ZOWIE is an amazing hand cleaner that cleans without the slightest injury to the hands. Removes grease and ground-in grime like lightning.

Zowie makes your hands feel fine. Each tab of Zowie contains carefully measured proportions of pure soap of the highest quality, glycerine and other healing and antiseptic ingredients, combined with cereals and hardwood fiber. It works into the creases and pores of the hands and gently massages and brings out the dirt.

It is the only abrasive soap that is permitted in many factories, because there is nothing in it to stop up drains.

Try Zowie—that is the quickest way to learn what this amazing soap will do.

Zowie is packed 40 Tabs in a heavy cardboard tube, 12 tubes to a carton, 12 cartons (144 tubes) to a case.

Prices

Price per tube.....$ .10
Carton (12 tubes)... 1.20
Case (144 tubes)....14.40
White enameled Tube Holder. Each.. .10

Special Introductory Offer

One carton of 12 tubes of Zowie, Special, for $1.00, including Tube Holder Free.

Special Case Lot Prices

To the garage and industrial trade. Full case lots. Per case....$9.60

Zowie is sanitary—a fresh Tab always at your finger tips when you go to wash—one Tab enough for a wash.
